Duplicate File Detector Crack Free [Mac/Win]

Duplicate File Detector is a complex software utility which aims at identifying duplicate files on your computer using an advanced search function with filters, in order to organize your data and free up valuable space on the HDD. The interface of the application is professional-looking. You can point out directories to include in the scan and create an exclusion list, as well as use an Explorer-based folder structure to navigate folders on your system. When it comes to scan settings, you can match items by file name, size or checksum type, specify attributes (read-only, hidden, archive, system) as well as use filters on dates and sizes. In addition, you can process subfolders and skip zero-length files, export hash sums, open and empty the Recycle Bin straight from the primary panel, change the interface theme, as well as copy or move duplicate files to another location, instead of eliminating them from the PC. You can use a file hash calculator, rename multiple files at the same time, choose another language and edit language packs, as well as map network drives and save projects to file for further modifications. Duplicate File Detector uses a surprisingly low quantity of CPU and RAM, so it doesn't affect the overall performance of the computer. It has a good response time and works well, without causing the operating system to hang, crash or pop up error dialogs. Thanks to its rich features and numerous configurable settings, Duplicate File Detector should be particularly appealing to expert users. Keymacro is a utility that allows you to record keyboard keys as macros and automates all the processes that you use with a keyboard repeatedly. At the same time, Keymacro offers a visual interface so you can easily assign keyboard shortcuts, record macros and edit the application settings. Keymacro includes support for multiple languages. It provides a handy option to auto-complete words, the ability to insert symbols or combine a whole sequence of keyboard keys with one key. You can record and edit macros in four different modes: menu-based mode, command-line mode, record mode and play mode. You can choose the way you work according to the keyboard type you are using, and the application is also easy to switch between modes. Keymacro can also enable the use of language-dependent hotkeys and offer an array of additional features, such as hotkeys for the Windows Start menu, the Send to menu and the Windows Explorer context menu. You can also use Keymacro to type symbols and even convert a text file into a macro. The full version of Keymacro comes with advanced features, such as a timer, visual feedback and large memory. As a result, you can enjoy convenient macros and a large memory to record as many macros as you need. Keymacro is compatible with various types of keyboard shortcuts: · ALT+Tab · CTRL+Tab · F1 · F10 · F11 · F12 · Shift+F10 · Shift+F11 · Shift+F12 · F2 · F3 · F4 · F5 · F6 · F7 · F8 · CTRL+F2 · CTRL+F3 · CTRL+F4 · CTRL+F5 · CTRL+F6 · CTRL+F7 · CTRL+F8 · CTRL+TAB · CTRL+SHIFT+TAB · CTRL+SHIFT+F2 · CTRL+SHIFT+F3 · CTRL+SHIFT+F4 · CTRL+SHIFT+F5 · CTRL+SHIFT+F6 · CTRL+SHIFT+F7 · CTRL+SHIFT+F8 · CTRL+SHIFT+TAB · CTRL+SHIFT+SHIFT+TAB · CTRL+SHIFT+SHIFT+F2 · CTRL+SHIFT+SHIFT+F 1d6a3396d6

What's New in the Duplicate File Detector?

Duplicate File Finder is a simple, yet incredibly powerful software utility which will allow you to detect and eliminate duplicate files in your PC. The application is designed to work without any installation, and does not require you to install additional libraries, ActiveX controls, or other components. Duplicate File Finder uses just a few megabytes of the computer's RAM and does not change the performance of the operating system. The software has a number of built-in filters that you can use to quickly find and eliminate duplicate files in just a few clicks. You can also create custom filters and run scans with them. Duplicate File Finder lets you preview files, open the Recycle Bin, as well as map network drives and save projects for further modifications. You can use a file hash calculator, rename multiple files at the same time, choose another language and edit language packs, as well as change the interface theme, to get the most of this application. The file scanner scans any number of files or folders you specify, finds and eliminates duplicates, and then deletes them. You can even detect the exact location of the duplicate file in your computer, and even perform an online search for this information. Note: "Duplicate File Finder" is a free application, however, it is also available as a downloadable version. The latter is available for download from our website and will take you just 2-3 minutes to install and use. All your photos, videos, music, and documents are not safe in just one place. You could lose everything if you delete a file from your computer by accident. Now, you can recover these data by using this one tool. It can scan your system deeply and recognize your lost or deleted files at once. There are three recovery modes: - Locate - Preview - Recover The Locate Mode: It can search quickly in your hard drive and find the lost files. If you don't find the lost file, please choose Recover mode to recover it. The Preview Mode: You can preview the lost files and then recover them by yourself. The Recover Mode: With only one click, you can easily recover the deleted files by you! Features: # Scan directories: - Quickly scan your system to find all files and folders. - You can add as many directories as you like to this tool. # Scan files: - The files could be lost from your system for lots of reasons: delete, format, damaged, etc. - There could be many files or folders with the same name in one directory. # Preview: - Preview the lost files in the preview mode so that you can recover them. - The files could be previewed in 4-5 formats. # Recover: - Recover the lost files in the recover mode
