
Justice Guilty 06

guilty Apr 06, 2013 11:58 am Gentlemen, I have two questions about using the unit. 1. How to make sure that the unit does not fall to the ground? It should not fall to the ground, I understand it this way. You need to make it just fly to the object. 2. How to make the object not move. So that the units do not move and do not stay in one place. So far I have seen only one way - the object itself has a "shock" property. With it, I move the object.
